Mr. Phil Taylor  
Tensar Earth Technologies  
5775B Glenridge Drive, Suite 450  
Atlanta, Georgia

Subject: **Blizzard Beach**  
**Walt Disney World, Florida**

Dear Mr. Taylor:

The purpose of this letter is to thank you for your efforts on the subject project. This year Blizzard Beach was nominated to receive national recognition in the ASCE Achievement Award competition. The project also received an Honorable Mention Award in the 1996 Florida Institute of Consulting Engineers' Engineering Excellence Award program.

As you know, the 90-foot high summit is the centerpiece of the Blizzard Beach Water Adventure Park. Thanks to the teamwork that occurred, the project met the required opening date of April 1, 1995. The efforts of Tensar were a key factor in the completion of all design and construction in a two year period.

Law Engineering was impressed with your firm's ability to analyze the extensive contour changes needed to make the project resemble a natural mountain. You also met the delivery schedule for the geogrid portion of the three million square feet of geosynthetics that were used.

As part of the design and construction team, we should feel proud of the mountain that we have created at Blizzard Beach. We look forward to working on more challenging projects with Tensar Earth Technologies.

Sincerely,

LAW ENGINEERING AND ENVIRONMENTAL SERVICES, INC.

Curtis J. Roos, P.E.  
Principal Geotechnical Engineer
