Mr. Philip M. Taylor
Tensor Earth Technologies, Inc.
5775-B Glenridge Drive
Lakeside Center, Suite 450
Atlanta, Georgia 30328-1290

Dear Mr. Taylor:

You are preaching to the choir! The lower middle picture in your brochure is our Rte. 100 project in Anne Arundel County, Maryland. You also did not point out that the geogrid system was the only allowable solution for wetlands covered under the Army Corps of Engineers permit for this construction as it was removal with minimal impact to the area.

It held up perfectly during the construction of piers and gave sure footing for the erection of the steel girders. Both operations required massive machinery and put your product to the test.

Sincerely,

Albert H. Williams
President
